

CAMPBELL RIVER, BC EV CHARGING STATIONS

With a population of approximately 32,000 people, the City of Campbell River is the third largest city and the fourth largest community on Vancouver Island, located in a scenic oceanfront setting on the eastern shore of Vancouver Island, British Columbia, Canada.

The City is committed to maintaining the ecological integrity of the area and its magnificent watershed. The City has identified key priority areas pertaining to sustainability planning, waste reduction, energy conservation, renewable energy, and environmental management and stewardship. One of the key components of the Strategy includes a commitment to develop a greenhouse gas emissions reduction plan for the community and achieve carbon neutrality in municipal operations.

The use of Electric Vehicles reduces CO₂ emissions by 50% compared to an internal combustion engine.

Campbell River, BC will join the British Columbia Clean Energy Vehicle Program (CEV).

The City of Campbell River is a signatory to the BC Climate Action Charter, which requires that the City reduce and where necessary, offset the greenhouse gas emissions from City facilities, fleet and traditional services to zero emissions by 2012.

The City of Campbell River is participating in the British Columbia Clean Energy Vehicle Program (CEV).

The CEV program is designed to provide British Columbians with a variety of clean and green choices for their transportation needs. The City purchased electric vehicle charging stations from Nedco and is having them installed at 3 sites by the end of March 2013. Each site will have 2 plug in heads allowing two cars to charge at each location. The City of Campbell River sites will be on the public electric vehicle charging network, electric vehicle drivers will be able to locate the City's charging sites on their computer or on the move using their smartphone. This is just one of the ways the City of Campbell River is showing their commitment to reducing carbon emissions and being a Green City.
