**City crews busy over long weekend working to protect properties along the river**

With a provincial flood warning in place and water flowing close to the top of the bank in the Campbell River late last week and earlier this weekend, City crews built a sandbag berm along the lowest edge of the river bank in front of Campbell River Lodge. On Nov. 11, crews stacked sandbags one foot high along 75 metres to reduce the possibility of water overflowing at this location.

In anticipation of peak rainfall forecast for Sunday, and in case the water level in the river overflowed the banks despite the additional height gained with sandbag berm, City crews also built a temporary dike adjacent to the Campbell River Lodge parking lot.

On the afternoon of Nov. 12, assembly of a 90-metre temporary dike took approximately four hours, with trucks delivering sand and gravel and loaders filling portable steel-cage containers. The temporary dike extends from Redwood Street almost to Petersen Road to hold back water that could overflow the river bank and spread into low-lying areas of Campbellton.

Funding for the portable flood protection system supplies and dike assembly work came from the provincial emergency program. The Province of British Columbia describes this temporary dike as being quick to deploy and construct, with a proven record in flood events and able to be disassembled, stored and re-deployed in future flood events.

The City installed both the sandbag berm and temporary dike with permission of the Campbell River Lodge and advised neighbouring property owners of the action being taken. Access to the Campbell River Lodge and neighbouring properties remains open at this time.

Campbell River fire fighters went door-to-door twice with written notices advising people of the flooding risk and how to prepare to protect their property from flood damage.

To assist people with protecting their property, supplies for sand bags are available at:

- Spruce St. and 19th Ave. (bring a shovel!)
- the City's Dogwood Operations Centre (385 S. Dogwood – enter from driveway on Merecroft)
- the Emcon yard at 7025 Gold River Hwy (intersection of highway and Argonaut Rd)

Find updates on:

- City of Campbell River's Website ([www.campbellriver.ca](http://www.campbellriver.ca))
- City of Campbell River Facebook page
- Strathcona Emergency Program Facebook page
- Strathcona Emergency Program Twitter feed @SEP\_EPC

While the river level is currently dropping, the City is continuing to monitor the weather and river levels, and crews are on call to assist as necessary.

**Please call 250-287-7444 for after-hours emergency assistance.**

Please keep a safe distance from the river because of wet, slippery conditions and fast-flowing water.
