

# LIFT STATION GENERATORS UPGRADE PROJECT

## Spring 2018

*On time and under budget!*

### Project Overview

Work under this project included a select number of existing sanitary lift stations to be serviced with appropriately sized stand-by generators as they did not have a backup power source to service the affected sanitary sewer pumping and control systems during power outages.

The sanitary lift stations that received generators are:

- No. 9 - Ocean Grove Road
- No. 10 - Maritime Heritage Centre
- No. 12 - Detweiler Road
- No. 14 - Antonelli Road
- No. 15 - Quinsam Road

Sewage / Wastewater lift stations, also called pump stations, are used for pumping wastewater or sewage from a lower to higher elevation, particularly where the elevation of the source is not sufficient for gravity flow.

In March 2016, RPF 15-81 for design services was awarded to RB Engineering Ltd. The construction contract was publicly tendered and awarded to Apple Electric Ltd. after City Councils approval.

### Funding for the Project

The construction tender was awarded in the amount of \$252,000. Budget was approved in the City's 2017-2026 Capital Plan and Sewer Reserves.
