

## HWY 19A WATERMAIN UPGRADE      SUMMER 2013

Hwy 19A between Pinecrest and Merecroft Roads

*On Time and On Budget!*

### **Project Overview**

This project involved replacement of approximately 440 lineal metres of watermain on Highway 19A between Pinecrest and Merecroft Roads. The existing watermain was undersized and has reached end of service life with resultant performance deficiencies. The upgraded watermain is larger to ensure that adequate flows can pass through the system. The work was limited to the north bound lane and seawalk area within it's corridor.

Highland Engineering and Surveying Ltd., based in Campbell River, completed the detail design. The project was publicly tendered in February 2013 with the tender being awarded to Wacor Holdings Ltd., of Campbell River.

Construction was completed in July of 2013.

### **Funding for the Project**

The project was approved in the 2013 Capital Plan and was funded by Development Cost Charges, and was delivered on time and for \$282,500 against an approved budget of \$301,870.
