Service Justification

impbell River's population has grown by 28.6% representing an increase of approx. 8,280 additional the community continues to experience steady population growth. Recognizing that there had not been an ice protective services since 2002 at a ratio equal to population growth, Council approved an increase of one rr ("RM") in the 2018 Financial Plan, and a further increase of one RM in the 2019 Financial Plan. ng, the steady population growth, fundamental changes in society, and profound changes within the policing s placed growing demands on already stretched police resources. This imbalance makes it increasingly blement necessary pro-active crime prevention initiatives designed to deter crime and keep residents safe. In poses an increased risk to both public and officer safety resulting from increased incidents with extremely ers and volatile situations. It is prudent and necessary to fill existing gaps in immediate service delivery as r incremental increases to meet the service delivery expectations as the population grows in years to come.

tment is required to staff to a minimum level. This position will reduce the number of overtime hours being r current staff, 4,200 in 2022. This will not an increase to the number of staff working at any one time. he August 17, 2023 Council Meeting

forcement Department is the only City department that does not have a dedicated manager. Along with -to-day operations, there are large number of proactive initiatives that are not being undertaken because cient resources to address them. The Director of Community Safety provides the department with assistance e needs to be undertaken to address issues of public disorder, public engagement and the needs of the mmunity.

hange is comprised largely of tax revenues associated with construction. This amount is estimated based on vailable from BC Assessment and has been estimated for 2024 in the amount of \$475,000.

City is required to meaningfully engage with the community, on various initiatives. From the Sustainable an to water restrictions or recreation opportunities, there is always a topic to engage with the public. An ool streamlines engagement and provides residents with a consistent method of reviewing information and ck across many issues. It allows the City to tailor engagement to the level needed at that moment; be that o empower or anything in between. The City must update communications policies and practices in 2023 to vincial accessibility legislation. One requirement is that municipalities need a tool to receive feedback on An engagement platform would meet this new legislation, while the City website does not have the capacity n effective way.

ecently purchased the DSO and therefore requires an operating budget to operate and maintain the building.

The Campbellton Neighbourhood Association was awarded \$986,429 for a River Route Parks and Trail construction. This route is 7km long and visits multiple new parks that will be constructed. It will enhance green spaces and will enable the celebration of history, culture and natural environment through storytelling, art installations and recreational infrastructure in the campbellton area.

Service Justification

x-based business solutions continue to evolve and impact all aspects of the City's operations, there are some rent and upcoming projects that demand significant GIS expert support and solutions. The critical Operations System (OMS) project is currently in the implementation phase and the GIS Analyst position is needed to lead ect data cleansing project to completion – work that is currently being done by the project-funded auxiliary GIS ne GIS Analyst is a critical position to support City asset management initiatives, will perform long-term administrative support for the OMS system, and technical support for field collection processes. By building ogramming and GIS application development, machine learning and AI, and allowing the City to test next-S tools the work of the GIS Analyst will improve GIS data accuracy and can build significant efficiencies for tents that manually collect field data. The GIS Analyst position will also directly support the safety driven (NG911) transition by performing technical work to update the City's GIS data sets to comply with Federal Improved service delivery times, redundancy for existing GIS support processes and an increased GIS ogramming and GIS application will be realized with this position. This added resourcing in the IT Department upport and service delivery in departments that directly support the City's community safety initiatives and y other strategic priorities.

permanent full-time resource in the HR Department will allow maintenance of service levels, provide critical e organization to enhance workplace culture and community safety, and to meet WorkSafeBC regulatory

v years, the City has seen a significant increase in staffing movement, caused by organizational growth and ting substantial pressure on all frontline functions of the HR Department. While the need for frontline HR rown significantly, the HR Department has been resourced with the same number of positions over recent has resulted in an unsustainable workload for the HR Department and a struggle to maintain current service have reached a point where organizational growth has outpaced the growth of one of its key support systems, rtment.

nd Safety (H&S) function is one key area where the HR department has limited capacity to meet adequate ery. Currently there is only one employee dedicated to overseeing City H&S initiatives for over 300 staff and ar cost-benefit to having this function adequately resourced resulting in savings to the City and benefiting alth, wellbeing and satisfaction. The City needs to continue building a positive safety culture, one that is sed and allows the organization to meet its legal obligations under the Workers Compensation Act, Canada and related regulatory bodies. The HR Coordinator role will provide key dedicated support to the H&S function withine HR service.

The polarized viewpoints and and often sensationalized media attention are common, corporate communication or important. Aligning currently decentralized resources supports efficient, strategic, planned and consistent cations that will help Council deliver on Strategic Priorities that tackle the complex social issues of today and the community. With only two dedicated resources in the Communications department and various major City and for 2024 and beyond, each with significant communications requirements, an additional communications is needed to support Corporate and Council strategic communications. Additional support will help increase munications and control the narrative to reduce harmful misinformation. Campbell River's growing population gislative changes relating to accessibility also increase the demand for tailored corporate communications services.

would provide support to the City Manager and the Senior Leadership Team in completing corporate and egic initiatives. This position would provide both administrative and project support to the senior management re that strategic priorities are able to be move forward consistently.
