

## It's the rainy season Help prevent flooding

***If there's a catch basin or culvert along the road near your home, keep it clear this rainy season.***

Plugged culverts and blocked catch basins prevent water from draining properly. That's when heavy fall and winter rains can lead to flooding on roads and in homes.

Help us keep water flowing by clearing away leaves and other debris from culverts and catch basins before storms set in.

Please report damaged catch basins to Dogwood Operations, by email to [dogwood.centre@campbellriver.ca](mailto:dogwood.centre@campbellriver.ca) or call 250-286-4033.

Thanks for your help!

***Enjoy your fire this winter, with less smoke.  
Heat your home efficiently and do your  
part for clean air.***

*Is your wood dry enough to burn efficiently? Bring in a sample of your firewood for a free moisture check.*

**Older wood stoves can smoke up your  
neighbourhood – and help is here!**

**Free demonstration by wood energy technician  
Zigi Gadomski at the No. 1 Fire Hall on  
Thursday, Oct. 10: 6:30 to 9 p.m.**

- See how new stoves provide a clean and efficient burn compared to older technology.
- Learn to burn...with less smoke.
- Attendees can enter a draw for one of five free WETT inspections by

**Limited seating – to book, call Mike at Guardian today.**
