### TIPS FOR PREVENTING STORMWATER FROM ENTERING THE SEWER

- Inspect roof gutters, downspouts and groundwater sump pumps to make sure they are NOT connected to the sanitary sewer system.
- If they are, have them disconnected. Direct downspouts into storm system or rain barrels, or onto lawns or garden beds.
- Never drain standing water from your property into a manhole, cleanout or inspection chamber.
- Have building sewer connections inspected by a plumber to identify leaking pipes – with the added benefit of catching potential system blocks before they cause sanitary sewer backups.
- Avoid planting any trees or shrubs over sanitary sewer or storm drain systems.

### HELP EASE DRAIN PAIN

Make sure rain water from your property is going into storm drains NOT the sanitary sewer system.
