

# WATERFRONT UPGRADES UPDATE

MARCH 2018 - NEWS BULLETIN 1.0

## READY TO ROLL

To meet Campbell River's vision of continued growth, new opportunities and the celebration of the community's waterfront, the city is set to begin an extensive three-year upgrade project this summer.

The Waterfront Improvement Project includes three key upgrades: an update to the waterfront sewer line between Rockland Road and the Maritime Heritage Centre, a rebuild of the Big Rock Boat Ramp and the next phase of Highway 19A improvements.

The first step in this important work will involve improvements to the waterfront sewer line – a critical piece of infrastructure that was originally built in 1972. Work will begin in May 2018, at the southern entrance to the downtown – from the Maritime Heritage Centre to 1st Avenue.

## LIVING AND WORKING NEAR CONSTRUCTION

This summer, construction will be focused between the Maritime Heritage Centre and 1st Avenue. The project team recognizes that this is a critical route for commuters and visitors to the city and that extensive road work will pose a challenge. To minimize impacts of construction, the project team will:

- Keep people informed of the work and traffic impacts
- Encourage the use of alternate routes
- Maintain two-way traffic as much as possible

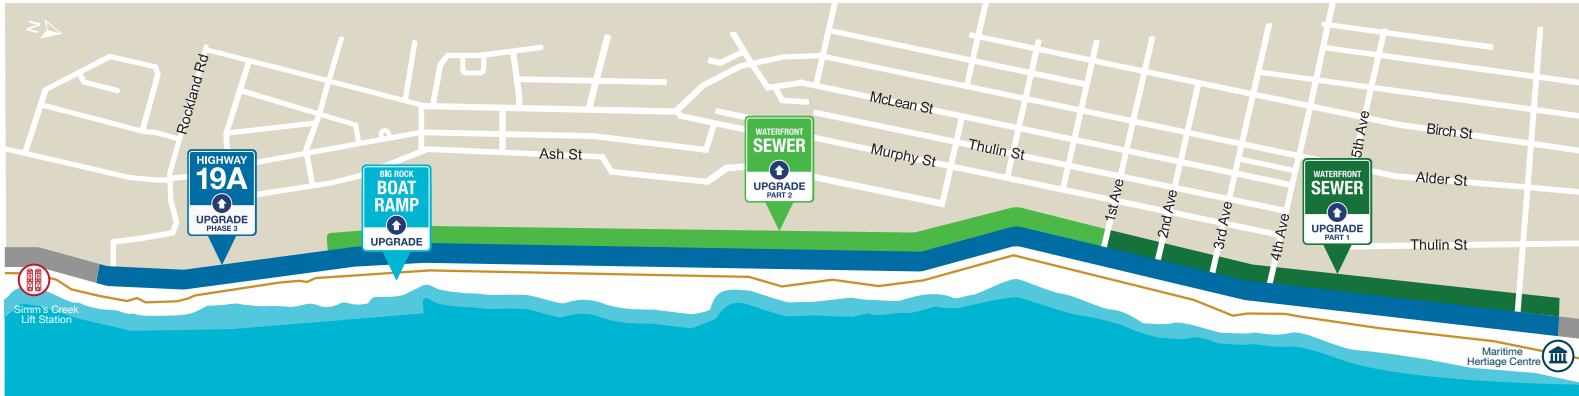

We encourage residents to continue their support of local businesses who may see changes to access and traffic flows as work takes place.

## WHAT'S NEXT?

# WATERFRONT UPGRADES UPDATE

MARCH 2018 - NEWS BULLETIN 1.0

## BIG ROCK BOAT RAMP UPGRADES

APRIL-SEPT, 2018

We know many people along this corridor are also active users of the Big Rock Boat Ramp – which will undergo significant upgrades to the in-water area over the summer months of 2018.

The new design will focus on improving safety and ease of use for all boaters and anglers. The ramp will close for construction in May and reopen in October.

Information about the design changes and a list of alternate boat ramps nearby will be posted on the project webpage.

## WATERFRONT SEWER UPGRADES

PART 1: APRIL-SEPT, 2018

*1st Ave to Maritime Heritage Centre*

The work involves:

- Renew/upgrade sanitary sewer conveyance lines on Hwy 19A from Rockland to 1st
- Upgrade affected lift (pump) stations along the route
- Install new forcemain along 19A road right of way from lift station No. 7 to 1st
- Connect the new sewer to new and existing lift stations
- Abandon existing forcemain, connecting Hwy 19A at Hidden Harbour to MHC
- Delete gravity main serving several properties between 1st and 3rd Ave
- Create new lift station to connect properties on east side of 19A from 1st to 3rd
- Address several existing gravity main connections

## WATERFRONT SEWER UPGRADES

PART 2: 2020

*1st Ave to Big Rock Boat Ramp*

## HIGHWAY 19A UPGRADES

PHASE 3: 2020 - 2021

*Area: 1 km – 300 m south of Rockland Road to the southern limit of McCallum Park*

The work involves:

- Reconstruction of 1KM of 19A from Lift station no. 7 to Big Rock Boat Ramp
- Significant reconstruction/upgrade of sewer and water mains
- Install storm drains
- Widen roadway, sidewalk, seawalk
- Add streetlights, enhance park spaces and waterfront areas
- Install underground electrical utilities
- Improve highway function, install Rockland roundabout

## KEEPING YOU INFORMED

As construction work is scheduled along the Highway 19A corridor, the project team – using news bulletins like these and other tools – will keep all informed. This will include specific outreach to homes or businesses directly in construction areas, prior to work starting.
