City Celebrates Drinking Water Week 2010 – Fire Department Training

The City of Campbell River's Water Department and Fire Department will be conducting a joint emergency exercise on May 12, 2010.

This practice drill is part of the City's proactive emergency preparedness program.

"We review operating procedures regularly to help prevent emergencies," explains the City's general manager of operations, Ron Neufeld.

"It's important to complete emergency exercises to ensure we're ready to respond to keep staff and the environment safe in the event of an emergency," adds Fire Chief, Dean Spry.

The exercise will be held along Hwy. 28, and residents are advised not to be alarmed if they see City staff and Fire Department in protective suits as they are conducting practice exercises.
