

Bathurst Watermain Installation Shetland Road Pressure Reducing Valve Station

Project Complete Fall 2020

On Time and On Budget!

Project Overview

This project consisted of installing a new pressure reducing valve (PRV) station on Shetland Road to improve the overall system performance of the City's water distribution network in this area and particularly with all of the future development.

Bathurst Road saw a new watermain installed to connect south McLean and Thulin streets.

Koers & Associates Engineering Ltd. conducted a review of the current flows and provided a recommendation for the new PRV. The Contractor, Knappett Industries Ltd., complete the work at the end of October 2020.

Funding for the Project

The approved budget for the project was \$225k as per the 2019 Capital Plan. The project was funded by the Water Reserve.
