

FIR STEET UTILITY UPGRADES

Spring 2019 to Summer 2019

On Time and Under Budget!

Project Overview

Work under this project consisted of installing a new watermain and water services on Fir Street between 9th and 11th avenues. The existing services were connected to old and/or undersized watermains which had reached the end of their useful service life. A storm drain, and storm and sanitary services were also included in the 1000 block of Fir Street.

These upgrades are part of a three (3) year watermain upgrade project approved by City Council at several locations throughout Campbell River.

Design was completed by the City's Capital Works and Water Departments. The construction contract was publically tendered and awarded to Knappett Industries Ltd.

Construction was complete in July 2019.

Funding for the Project

Budget was approved in the 2016 Capital Plan and was funded through the water and storm reserves. The project was delivered on time with a final cost of \$582,000.
