

The following questions and answers are intended to provide an overview of this project.

1. What is the project?

The work will include the installation of approximately 95m of 250mm diameter stormwater pipe connecting the existing collection system to the outfall location at the waterfront. This pipe will provide an overflow relief to the storm system during surcharged conditions when the winter storms result in high tides causing localized flooding in the Shoppers Row/Pier street location.

2. Where is the project located?

The work will take place at Robert V. Ostler Park on the south side of the log house with the upstream catchment area affected being limited to those buildings fronting Shoppers Row between St. Ann's and 10th Ave.

3. When is the construction work going to take place?

The construction is scheduled to begin in early September 2022 and should be complete by the end of September 2022.

4. What is the cost of the project?

The final cost of the 2022 portion of this project is estimated at \$74,000.00.

5. How is the project being funded?

The project is being funded by Storm Water Reserve. This amount has been approved by Council in the 2022-2031 Financial Plan.

6. Who will be involved in the project design and construction?

The work is being completed under a Design, Bid, Build model. Design has been completed by the City's Capital Works Department. The construction work has been awarded to Edgett Excavating Ltd.

7. How will vehicle and pedestrian traffic be managed during construction?

Traffic management during construction will be the responsibility of the contractor doing the work. The contractor will have traffic control in place ensuring safe passage for vehicles and pedestrians around the work zone at all times. The project will not result in any necessary traffic detours with no measurable disruption to existing traffic flows expected.

8. What do I need to know?

Pedestrian traffic along the Robert V. Ostler portion of the seawalk will be Temporarily detoured during construction. Park use will be restricted during the course of construction with the location of the works temporarily closed to the public.
