

Hilchey Rd Watermain Renewal Phase 2

April 4, 2022

Project Update Notice

We are preparing to return to site and wanted to reach out and let you know what you can expect.

The City is awaiting additional permitting from the Province for the watermain replacement between Dalton Road and the South Island Highway. No work can be scheduled to complete this section of the project until permitting is received.

In the meantime, we are planning to complete the remainder of work West of Dalton Road. The items to be concluded consist of:

- Selected curb and sidewalk panel replacement
- Affected driveway reinstatement
- installation of the final paving surface where work is complete
- landscape restoration of impacted properties (including seeding of grassed areas)

For affected properties, please follow these tips to promote healthy growth of your new lawn once topsoil and seed have been placed:

1. DO NOT walk or drive on the restored lawn
2. DO NOT rake or disturb the restored lawn
3. DO NOT move or spread it around
4. DO water regularly for best results
5. DO be patient; new grass should start to appear in 4-6 weeks.

Please remember to use extra caution in active construction sites, and heed the instructions of signage and traffic control personnel for everybody's safety.
