Clean Catch Basins Prevent Flooding

You can help!

**Please remove leaves from catch basin grates
close to your home.**

As trees shed leaves in autumn, some catch basins become blocked.

Localized flooding occurs when water can't flow through catch basins into storm drains during heavy rainfall.

Many of the City's 3,300 catch basins discharge to environmentally sensitive fish bearing streams.

Please keep oil, paint, and other contaminants away from catch basins to prevent pollution and fish kills.

Report damaged catch basins to the Dogwood Operations Centre via email (dogwood.centre@campbellriver.ca) or telephone (250-286-4033).
